- Interior side wall pockets for extra storage ie iPad, books, maps, glasses etc.
- Curtains over tinted window

## Optional extras at extra cost

- 32L fridge @ \$30 per week, \$25 a long weekend and \$20 a weekend
- Shower tent and 12v shower @ \$25 per week or part thereof
- Fuel or water jerry cans \$5 each per week

## Charging Tvan battery

- The battery is trickle charged continuously via the solar panel on sunny days.
- To charge the battery while driving you will need an anderson plug and wiring to your vehicle's battery (to the second battery is the best configuration). *An anderson plug is not essential when hiring; just be aware that the sun may be your only source of energy. Pin 2 on your electrical plug must be live.*
- To charge the battery using 240v power connect the 15 amp extension lead to 240V power supply to the Tvan's external power point. The on board battery charger monitors the rate of charge and will cut out when the battery is fully charged. We recommend you do this regularly (every 4-5 days) if you are running a fridge in the Tvan especially if you don't have an anderson plug.

## Tvan cleaning instructions

- Wipe floor of tent area with a damp sponge on the last morning
- Fresh water hose outside of tent **only** if very dusty or sandy. Do not use any soaps or detergents on canvas
- Hard surfaces – use soft cloth or sponge and household detergent. (Car Lovers works well)
- High pressure hose underside especially if you have been over muddy or any sandy terrain
- **Do not use brushes or scourers on any surface including the stainless steel kitchen**

**NB: Tvan's returned dirty will incur a cleaning levy of \$250.00 deducted from your security deposit**
