Australia's No.1 Slide-on Camper

The Trayon Camper range have been exploring all parts of Australia and the world since 1994. These campers will go anywhere your 4x4 can go thanks to its legendary and proven toughness aided by its light-weight design as well as its low profile and centre of gravity. Taking only 3 minutes to erect for camp, it is a quick and easy (1 person) operation for the user to start enjoying the outdoors. Each camper has the ability to free-stand either in camp or for storage to free up your vehicle for normal everyday use. The campers are independent and non-reliant on the vehicle to give you the freedom of choice to camp either on the vehicle or off on its own leg.

No Tow - Way to Go™

Aussie travellers love the light-weight, water and dustproof camper with all the comforts of home for its compact layout and its ease of use but the fact that you don't have to tow anything is what really makes the Trayon Camper range so popular among campers and explorers. You can go further, use less fuel and sneak into tighter spots compared to what you would have towing a camper trailer. The Trayon Camper is made primarily from non-welded Aluminium (not Fibreglass like most other campers) allowing for a light-weight and super-strong flexible structure that comes with a **10 year structural warranty**.

Trayon Slide-on Campers

- ▶ No camper registration required means you save min \$60pa
- ▶ Lightweight [from 390kg]
- ▶ Low profile when travelling means you save between 5% and 20% (\$1-\$3/100km) fuel savings on other campers or towing a caravan
- ▶ Low space consumption when in storage means you could fit this in your garage as well as your car and nothing out in the weather
- ▶ 10 years Structural Warranty gives you piece of mind that it is here to stay
- ▶ 100% Australian Made this means you support Australian jobs
- ▶ Ready for short term or long term trips means you don't have to spend ages setting it up for an overnigher
- ▶ Fantastic resale value means it truly is a great investment financially as well as in your family
- ▶ Easy and quick to open and close [3min]
- ▶ Fast and effortless to detach from vehicle [6min]

Weigh less... Contains more

Trayon Slide-on campers are made out of aluminium, not fibreglass like most other campers. That not only makes it stronger but also hundreds of kilograms lighter than other tray-back/slide-on campers. In other words...you can fit more of your own stuff in and Trayon has plenty of storage room for just that. On top of that, Trayon is fitted with a proper size fridge/freezer [100 litres], gas bottle [9kg], water tank [110 litres] and a built in battery system [120amp/hr]...all for your convenience in the bush.

TMO – Trailer Mount Option (Pictured Above)

Trayon Campers now have a full range of campers to go with any variation of four wheel-drives. With a Dual cab, Extra cab, Single cab and the all new Trailer Mount Option [TMO] that has a separate shower and toilet, we have you covered. The slide-on campers have a 10 year structural warranty and the TMO can be paired with any of our Slide-on campers. When the TMO is paired with our "Deluxe models" you effectively have access to 2 showers, 2 toilets, 2 kitchens [if optional] and 2 water tanks with ample room for storage... all of these features packaged in a tough, 100% Australian made, off-road camper trailer.

Expect... a 10 Year structural warranty

To prove the superior quality of a Trayon, we offer a 10-year structural warranty. Not that you'll ever need it. The aluminium structure is almost indestructible – unlike fibreglass it won't crack no matter how far off-road you take it. The canvas section is made from only the best quality Bradmill material, designed to meet any challenge the Australian Bush and or beach is likely to throw at it.

TRAYON SINGLE CAB

A Trayon Camper will fit on the tray on almost any single cab or extended cab ute. The single cab sleeps two people in style on the large double bed and the table drops down to create an additional single bed.

The list of standard features is long but if you appreciate that extra bit of comfort in the bush, the deluxe model includes a hot water system, external shower, portable toilet as well as extra storage drawers.

TRAYON DUAL CAB

The dual cab Trayon sleeps as many as you can fit into your ute (4-5). The bench with fridge and storage underneath can be turned into a bed. The dual cab is also available in the Standard, Deluxe or Diesel Deluxe.

The low weight (370kg) allows you to fill up most dual cab utes with people and baggage without reaching the maximum load capacity.
